# NORFOLK LUNATIC ASYLUM.

---

## Medical Superintendent's Annual Report

FROM CHRISTMAS, 1869, TO MICHAELMAS, 1870.

---

TO THE COMMITTEE OF VISITORS.

I beg to lay before you the Report, for the nine months of the present year, ending September 30th. 45 male and 60 female patients have been received ; making together, 105, which added to the 442 remaining, in the Asylum, at the end of the previous year ; make a total of 547 under treatment during the whole period. 44 men and 48 women, *i. e.*, 92 patients have been dismissed, or have died, and 190 men and 265 women remain ; making a total of 455, (*see Table 1.*) showing an increase for the 9 months of 13 patients. 27 men and 27 women or 54 in all were discharged cured ; 5 of the men and 9 of the women having been absent on trial, when in an advanced stage of convalescence. These were all with one exception, reported to have done well, and were then finally dismissed. One woman suffered a speedy relapse, owing to her husband's rough treatment ; 5 men and 1 woman who were discharged, relapsed during the present year, these however had so completely recovered, and had remained well for so long a

time preceding their dismissal, that there was no ground whatever for their detention. 14 men and 15 women died of grave diseases, which are in no small proportion peculiarly fatal to insane patients, (*see Table 3.*)

27 of the patients admitted were suffering from renewed attacks; these compared with the remainder, form rather more than a third of the whole number.

The recoveries have been more numerous than in 1869, whilst the death rate has been unprecedently low. The recoveries were 51.4 per cent. of those admitted, instead of 47.99 per cent. as in 1869; the deaths were only 6.3 per cent. of the average daily number, instead of 12.96 as in 1869.

I am happy to say, that the general health of the inmates, has been, at least as good as in any former year. We have almost always on our sick list a large number of feeble, aged and decrepit patients, who do not require any special medical treatment, but merely good nursing, food, and clothing.

An inquest was held in January last upon an attendant, who was found dead in his bed. The cause of his death was extensive disease of the heart, his loss was much felt, as he was an excellent trustworthy person, and had been some years with us.

Several minor accidents have occurred, but are of too trivial a character to require any comment

Amongst a large number of insane patients, many of whom are very quarrelsome, &c., it is surprising that serious casualties are so rare. The escapes have been few in number, and in every case the patient was captured after a short absence. The employments and amusements of the patients have been conducted as in former years, but it is to be regretted that we get so few artizans, whose labour would be remunerative, our patients are for the most part of the agricultural class.

In the course of the nine months, several of the day-rooms and associated bed-rooms and corridors have been colored, papered and painted, indeed, this kind of renovation is always necessary, and is in all like establishments quite essential for health.

I wish to refer to the "Archimedean screw ventilator," which has been introduced into the day rooms belonging to our Men's Infirmary, where are several paralytics, whose habits are hopelessly dirty. Since its introduction and employment, I have noticed a marked improvement in the purity of the air of the apartment.

We have 14 female and 7 male patients who are under contract from the City of Norwich, and Boroughs of Yarmouth and Ipswich ; one female (a paralytic), belonging to the latter could not be removed when their other lunatics left us for that new Asylum.

I am glad to report, that 3 months since a head male attendant was appointed, from whom I anticipate much assistance and increased efficiency, in the working of the Asylum.

I am happy, in conclusion to say, there have been very few changes in the staff of attendants and servants during the last 9 months, a fact worthy of remark in the working of so large an establishment, where there must necessarily be a great number of servants liable at any moment, to give trouble in some shape or other.

WILLIAM C. HILLS, M. D.

MEDICAL SUPERINTENDENT.

*The Commissioners in Lunacy inspected the Asylum in April last, and made the following Report.*

NORFOLK COUNTY ASYLUM,

APRIL 19TH, 1870.

We have to day gone over every part of this Asylum, which we have found to be in excellent order. The additional accommodation for women, in which there were assembled 53 patients, has relieved the overcrowding of the main building, from which the other principal defect is now in course of removal by the construction of additional waterclosets and sculleries in the old wards. Effectual remedy has thus been applied to what we described two years ago as almost the only drawback from the excellence of this Asylum, and from the considerate arrangements everywhere made to provide in all respects for the cheerfulness and comfort as well as kind and judicious treatment of its patients of every class.

The new (Women's) accommodation it would be difficult to praise too highly, the block is detached, but in immediate connection with the main female building, to which there is access through an adjoining corridor. Besides the associated dormitories, there are twelve single rooms, and in the construction of these as well as of the day rooms, with their bay windows looking upon a terrace, airing court, and garden beautifully laid out, with a view to the same completeness of effect which we have so repeatedly praised in the other airing courts of this Asylum. There is really nothing to desire, the furniture which is of polished birch, is of a superior kind, and all the several fittings and articles for use by patients are of the homely domestic sort, which is most appropriate and suitable.

The beds are of horsehair with the white counterpanes generally in use here, and as with the dormitories in the main building, there will be white curtains and a cheerful paper on the walls, we have been glad to learn that this new accommodation in all respects so complete, so substantial in its character, and furnished so solidly, yet with so light and pleasant an effect, will have been finished at a cost of £4000 for 54 patients, or at an average of about £74 for each person ; the ventilation we should have remarked is unusually good. Since the Asylum was visited on the 18th March, 1869, there have been 177 admissions, 64 males and 113 females ; 78 discharges, 29 males and 49 females, of whom all but one man and six women entered as only " relieved " had recovered, and 59 deaths, 26 males and 33 females.

There was one suicide by drowning in the year, of which the circumstances were communicated to our board, and all the other deaths were from ordinary causes. The number who died from general palsy, epilepsy, chronic brain disease, and old age, 30 in all, sufficiently accounting for the somewhat high rate of mortality. There were besides 17 cases of phthisis and bronchitis and pneumonia, and 2 of apoplexy. In the Asylum to day, we saw 190 men and 260 women, 450 patients altogether, there being in addition 3 men and 1 woman absent on leave or probation.

The out County patients, among whom are 29 belonging respectively to Ipswich 5, to Norwich 19, and to Yarmouth 5. This leaves on the male side 11, and on the female side 22 vacant beds ; the present weekly charge being 8s. 6d., while for out County patients it is 14s.

The personal condition of all these patients must be described as on the whole extremely satisfactory, giving the precedence in this respect to the women, the neatness and variety of whose clothing we thought very pleasing, some of the men would have been improved by a little more care from their attendants, and it would be desirable if arrangements could be made to supply them generally with Sunday suits. But the quiet and good order, the freedom from excitement everywhere were remarkable con-

sidering the character of very many of the inmates, and it is impossible to disconnect this circumstance from the sufficiency of the provision made in all parts of this Asylum, for the relief of the dulness and apathy of the patients (as far as possible) of every class by material and inducements for occupation or amusement, and by the attractiveness of the airing courts. They are also liberally taken for walks, and occasional country holidays beyond the Asylum. Nearly 300 take part in the weekly dances, and as many as 322 attended a grand concert given last January

It is but a part of this same subject, to add that with even the large proportion here of patients classed generally as troublesome, there have been only six instances of seclusion applicable to five patients during the last thirteen months.

The records of employment shew about the same numbers regularly occupied, 93 men and 137 women, of the former 41 work on the land, 12 in the shops, and 15 in the offices, while of the latter 32 are in the laundry and kitchen, and 81 do needle and knitting work.

The attendants are the same on each side as described at the last visit, with the addition of three nurses for the new female block; and we have still to regret that there is no head attendant on the male side. In the female division, this duty is very efficiently performed, and we are convinced that such an appointment in the other division would be felt equally as an advantage to the patients and officers of the Asylum.

The day rooms and dormitories were in the best order as we passed through, and there were only two or three of each sex in bed.

In the dining hall we saw a good dinner well served, amid perfect quiet and order on the part of all assembled, to 144 men and 188 women, somewhat near to these numbers is the ordinary Sunday attendance at chapel, the average being 148 men and 170 women, while the Wednesday Services being together about 232 of both

sexes. We may add that in the interval since the last visit, several of the rooms of the old building in both divisions, have been newly papered and painted.

Of the manner in which Dr. Hills continues to superintend this Asylum, of the great ability, and untiring zeal applied by him to the service and kind treatment of the patients, the facts stated in our report, are the strongest testimony, he is aided very efficiently by Dr. Taynton, and we have pleasure in further stating that besides strictly carrying out the bi-monthly visitation required by the Statute, one or more of the Visiting Magistrates attend weekly, not on fixed days or hours, and go round all the wards, attending also every month in larger numbers, for the discharge of patients, and other ordinary business.

*Signed,*

JOHN FORSTER, } Commissioners  
JAMES WILKES, } in Lunacy.
